• Microsoft Word • Technical Writing• Effective Communication •Basic Web Development • Content Writing • Management • Team Work • Hardware and Networking • Java Programming

Experience

5 Feb 2022–10 March 2023
• Entegrasources Pvt. Ltd.
New Baneshwor, Kathmandu

June 2019–February 2022
Flutist-Sanskar Band

2022–current
Content Writer• Self-Employed • Free-lancing

After completing my high school education, I got enrolled in the science faculty facilitated by the National Examination Board of Nepal. Alongside this, I took hands-on training in computer hardware and networking in my first year of intermediate school on account of my keen interest in computers. I want to build a career as a full-stack developer and achieve some significant expertise . Thereby, I got enrolled in the BSc-CSIT faculty offered by the department of IOST, Tribhuvan University. I am here to learn and develop my abilities in the software development field, particularly in MERN entities, and Java Programming. Since Java Programming was included in our course syllabus, I have basic knowledge of Java-related things. I built a Fitness Gym Management System for our final year project in the seventh semester based on Java. I am also a flutist, and we had our hometown music band named Sanskar in Butwal. Last year, I was working as a technical writer at Entegrasources Pvt. Ltd. because it was a necessity to finance my academic expenses.
